Typically click bait links will forward the user to a page that *REQUIRES PAYMENT*, registration, or is one in a series of pages to help drive page views for the site, which makes it appear at the top of results on search engines (like Google).

Most click bait type links have catchy or provocative headlines that are *DIFFICULT FOR MOST USERS TO RESIST* and often *HAVE LITTLE OR NOTHING TO DO WITH THE ACTUAL WEB PAGE.*

PRO TIPS:

- If it's too good to be true....
- You have not won anything!!!!
- Ads will usually say "Advertisement" in very small letters
- Ads can be deceptive (warning! 247 viruses detected!)
 - If it's not a message from your anti-virus software brand name, then it is a deceptive ad.
- Don't download anything unless it is a program or document you were specifically searching for
- If something seems suspicious, you can always "Google It!"
- If it's a scam, many people will have b*%ch@d about it way before you, and that will show up on Google.
